

## **PAIN T AN AP PLE TREE**

Paint the underside of a child's arm, from their elbow to the tips of their fingers with brown paint.

Have the child press arm and hand onto a piece of white paper to make a tree.

Now have the child paint green leaves on the tree by dipping their finger into green paint and making finger prints on the branches.

This project could also be used to make a fall tree. Instead of green finger prints, children could make red, orange and yellow finger prints.
